

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental company which features Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

In the U.S.A., Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot manufacturing facility, which is the home of the Compact Equipment and Construction division. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Forklift division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer needs.

With a association consisting of over 90 independent sellers, the forklift group supplies quality materials handling equipment to the wide-ranging North American market. Doosan Infracore America Forklift sellers successfully operate in over 220 service and product sales places throughout Canada and the U.S. The forklift product line impressively features 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle designs range from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift business in the North American market, thanks to their stability in maintaining a high level of customer service quality and optimum product performance to all Doosan Infracore Forklift users. The U.S. forklift division stationed in Cleveland has a professional team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original home-based forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a national equipment expansion venture. Early sales of this manufacturing equipment focused on large business communities, the armed services and on state-run firms. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical education became the new focus for enhancing quality and product development.

Home-based forklift trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's progressive technological advancements combined with sales success placed them in a position of substantial growth of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to respond to competitive pressures in the US materials handling industry. This plan radically expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a new plant which helped set up the company for the manufacture of high end added-value goods suited for export. In 1993, the corporation had a global sales network and started exporting designs they had developed through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international marketplaces.
